INVENTUS
NEW: *DETT*

DETT-Technologie In Direct Energy Transmission Technology (DETT), the sponge cells in the rubber sheet are more compact and additionally subjected to tremendous tension. This allows for a more direct energy transfer to the ball, significantly increasing speed and catapult values. Counter-topspins become more efficient and easier to play, even if you fail to hit the ball at its highest point. Ball trajectory remains flat enough to make it arrive even faster on the opponent's side, giving the opponent even less reaction time.

**SIMPLY BETTER. BELIEVE IT. GEWO INVENTUS XT PRO.
SHARPEN YOUR GAME!**

Inventus XT

- The speed of your rubber should be generated more from the sponge.
- You need a slightly longer contact time at the point of impact for your shots.
- You want to be able to play with high speed and rotation and still have sufficient control.

Nexus SuperSelect

- You prefer a more direct and compact feel and generate rotation with rather short movements.
- You also introduce more passive strokes into your playing system from time to time, but your rubber must not have a maximum catapult effect.
- Speed and rotation are roughly equally important to you.

Nexus

- You need a rubber that enables maximum acceleration through mostly short movements.
- Your rubber must always couple reliably and offer optimum energy transfer in every situation.
- Speed and rotation should be as high as possible and still be sufficiently controllable.

NEW: FLEX TECH 2.0-Technology

THE PIMPLE HEADS IN THE RUBBER ARE ARRANGED AT A GREATER DISTANCE. FOR MORE SPEED. LONGER BALL RETENTION TIME FOR MORE SPIN!

The flexible sponge/rubber design FLEX-TECH 2.0 (XT), crafted specifically for GEWO, demonstrates impressive base speed. Rubbers from the XT series, featuring the H-Touch DGC 40+ 3.0 surface, transform the speed of the opponent's topspin, into self-energy and release it catapult-like when leaving the bat. The pimples on the rubber sheet are arranged further apart and are slightly narrower than on EL rubbers. These rubbers primarily focus on speed.

*Flex*_{2.0}
Tech

XT SPEED & SPIN FOR MORE

GEWO Inventus XT Pro 52.5

OF/OF+

The hard (52.5°) yet dynamic sponge is the prerequisite for maximum power table tennis! This variant focuses clearly on the successful combination of hardness, speed, and feel for all more controlled strokes to set up point-winning finishing shots. The 52.5° hardness power sponge provides speed reserves in all match situations, allowing you to initiate dangerous counter-attacks even from a defensive position. A tendency towards short and dynamic strokes and a high general playing level are prerequisites to unlock the maximum potential of this true offensive powerhouse. Counter-topspins executed at the table or from mid-distance can be effortlessly performed, exerting immense pressure on the opponent with limited reaction time attributed to the flatter trajectory in contrast to softer variants.

- Harder, faster, and more direct, yet with the necessary spin and a not too flat trajectory
- Ideal for players who operate close to the table and want to deprive their opponents of time for dangerous counter-attacks through quick and short arm movements
- Perfectly suited for players who need a hard and dynamic sponge for their „counter-spin oriented“ game, but cannot compromise on the best possible control and brilliant touch

Speed: 135, Control: 82, Spin: 123, Thickness: 2,0 / max,
Sponge hardness: 51,9° – 54,4° / hard

■ ■ ■ Item no.: 11477

€ 59.90 Available from June 2024

GEWO Inventus XT Pro 50.0

OF/OF+

The GEWO Inventus XT Pro offers a more compact and direct feel with its 50° hardness variant compared to the 47.5° hardness version, yet still allows for controlled and spin-oriented play when necessary during a match. The power-loaded sponge enables quick transitions into all offensive strategies and, thanks to the combination of DETT technology and LTT technology, always provides the necessary control and spin values to stay in control of the game and determine the course of play.

- Ideal for swiftly transitioning from more passive strokes to point-winning attacking.
- Great for players who need a harder sponge for their attacking but still seek maximum touch and spin.
- Perfect for players aiming to seamlessly integrate speed, spin, and touchplay for optimum performance.

Speed: 132, Control: 85, Spin: 125, Thickness: 2,0 / max,
Sponge hardness: 48,9° – 51,4° / medium hard

■ ■ ■ Item no.: 11476

€ 59.90 Available from June 2024

GEWO Inventus XT Pro 47.5

OF-/OF

In its 47.5° hardness variant, the GEWO Inventus XT Pro becomes a true all-rounder in the OFF domain. High speed, dynamic spin arcs, and high control values make every player's heart race, particularly those who don't want to compromise on a medium-hard feel for their attacking strategies. The optimized combination of a relatively compact power sponge with the flexible and highly grippy top rubber elevates topspin and counter-topspin strokes to a new level. Benefit from longer ball contact time and added control, giving your strokes more quality and enjoyment.

- For players in search of high speed and dynamic spin arcs, while also placing value on perfect ball coupling.
- For players who want to control the game both close to the table and at mid-distance.
- Ideal for players who seek an absolute power sponge for the hardness they require in their strokes but don't want to compromise on a flexible top rubber.

Speed: 128, Control: 88, Spin: 127, Thickness: 2,0 / max,
Sponge hardness: 46,3° – 48,8° / medium hard

■ ■ ■ Item no.: 11475

€ 59.90 Available from June 2024

ECO GRIP FOR YOUR MATCH

The globally successful introduction of NEAS sponges (New Efficiency Active System), combined with the proven eTec (Eco Boost) technology, has made the GEWO Neoflexx series an absolute best-seller in the category of versatile, easy-to-play rubbers that aren't too fast.

The overwhelmingly positive feedback has inspired us to develop a new generation of rubbers that offer even higher speed and spin values without neglecting the focus on ease of play and controllability. Especially younger players or those wishing for a bit more speed and variation without sacrificing too much control will enjoy the new GEWO Elaxxon eFT variants.

Countless hours of testing and meetings resulted in a rubber composition that stands out:
GEWO Elaxxon eFT.

GEWO Elaxxon eFT 50.0

OF/OF+

The harder version provides a more direct playing feel, higher speed values, and still enables excellent control for any kind of attacking strokes. For those seeking a balanced offensive rubber that remains reliable in all game situations, the 50° hardness sponge version of the GEWO Elaxxon eFT is the ideal companion for successful gameplay.

- eGrip provides increased rotation and control values without resulting in unmanageable susceptibility to spin
- With the 50° hardness sponge version, even better attacking options are available while maintaining the pleasant and flexible playing feel
- Ideal for players seeking a moderate offensive rubber that prioritizes ease of play

Speed: 107, Control: 93, Spin: 118, Thickness: 1,9 / 2,1 / 2,3
Sponge hardness: 48,9° – 51,4° / hard

■ ■ Item no.: 11373

€ 41.90 Available from June 2024

GEWO Elaxxon eFT 45.0

OF

The slightly softer version of the GEWO Elaxxon eFT sponge provides a comfortable and flexible feel, ensuring you have the necessary response in every rally. The moderate speed gives you the confidence to shine both in passive and active situations. The fine tuning of the 45° hardness medium sponge with the flexible top rubber allows offensive all-rounders and ambitious young players to fully utilize their potential.

- eGrip provides increased spin and control values without excessive susceptibility to spin.
- With the 45° hardness sponge version, even better all-round offensive options are available while maintaining the pleasant and flexible playing feel.
- Ideal for players seeking a moderate and not too hard offensive rubber that effectively supports all strokes in their repertoire.

Speed: 104, Control: 96, Spin: 115, Thickness: 1,9 / 2,1 / 2,3
Sponge hardness: 43,8° – 45,8° / medium

BAGSERIES SPY

The new GEWO Spy bag series is the ultimate choice for table tennis players looking for style, functionality and durability. All details have been carefully thought through to meet the needs of players. The bags are made from a high quality dark gray fabric that is timelessly understated yet appealing. With the Spy series, we offer you and your equipment a high-quality, sporty look at the cutting edge.

GEWO Sportsbag Spy

The Spy sports bag in sporty, elegant dark grey is a true all-rounder. With enough space for all the items you need for your game, it leaves nothing to be desired. Whether you're training, competing or traveling – this bag adapts flexibly to your needs, just like you adapt when playing against your opponents.

PRATO

The upper section of the shirt features a striking colour contrast that immediately catches the eye and adds a modern touch to your outfit. Inspired by the fluid movement of the table tennis ball, a subtle wave pattern is incorporated into the design. These waves are not only reminiscent of the game, but also give the shirt added dynamics and energy.

EAGLE

GEWO Gold Flex

EU-Sizes: 35–46**Weight: 246 g / Heel damping: 20 mm / Sprengung: 10 mm**
in size 41

Modern table tennis is a demanding sport that requires fitness, agility and speed. For this reason, table tennis shoes must have a whole range of features that simultaneously support the player and protect them from injury. To play table tennis successfully, the choice of the right shoe is almost as important as the choice of rubber and blade. The new Gold Flex model from GEWO masters all the challenges for a contemporary indoor shoe that arise from the sport of table tennis. The GEWO Gold Flex was developed for real power table tennis and impresses with a stable sole construction for lightning-fast turns and uncompromising stops. The shell-like, pre-shaped multi-component sole encloses the foot on all sides and widens slightly towards the ground. This keeps the foot in position in the shoe and effectively prevents twisting due to cross-sectional deformation of the sole. The upper shoe has a classic design. All relevant areas are reinforced to stabilize the upper foot. The padding in the heel and entry area and the tongue offers good protection against mechanical stress from the outside and ensures a high level of comfort during matches. Mesh fabric in the side areas ventilates the shoe and contributes to a balanced shoe climate. Thanks to the careful and robust workmanship, the shoe can be laced in the traditional way.

**Colour:** white/gold **Item no.:** 11483Please order one size **larger!****€ 79.90**

GEWO Schuh Light Flex Red

EU-Sizes: 35–46**Weight: 250 g / Heel damping: 22 mm / Sprengung: 11 mm**
in size 41

Don't miss the chance to equip yourself with a pair of perfectly fitting shoes at an unbeatable price to give your opponents a run for their money on the court. Thanks to its convincing features combined with its low price, the Light Flex will keep you one step ahead and your wallet less stressed. The sole is a classic, hard-wearing and non-slip indoor sole that has proven itself millions of times over. The upper shoe is a successful combination of comfortable material that is permeable to air and a clever cut that offers sufficient stability thanks to cleverly reinforced shoe sections. The upper is made of mesh material and is reinforced all around with synthetic leather to offer the player optimum stability.

**Colour:** white/rot **Item no.:** 11482Please order one size **larger!****€ 59.90**

GEWO Schuh Light Flex Blue

EU-Sizes: 35–46**Weight: 250 g / Heel damping: 22 mm / Sprengung: 11 mm**
in size 41

The shoe design is timeless and reminiscent of the spirit of the 80s and 90s. The shoe could become another GEWO table tennis classic and win over many players with its modern retro charm. The basic shape of the silhouette was first introduced around 35 years ago and has been a key feature of GEWO indoor sports styles ever since with its tried-and-tested colors, high level of comfort, breathable upper material and robustness. The slim fit, combined with synthetic leather and mesh, offers durability and breathability and represents a good alternative to the all-over synthetic leather styles of today. Whether you're playing a match or taking a break, this shoe always guarantees a sporty, stylish appearance.
