INVENTUS

GEWO

STANDARD

NEXXUS

nexxII

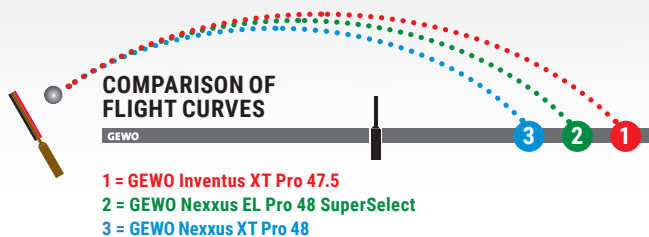

INVENTUS

DETT

DETT-Technologie In Direct Energy Transmission Technology (DETT), the sponge cells in the rubber sheet are more compact and additionally subjected to tremendous tension. This allows for a more direct energy transfer to the ball, significantly increasing speed and catapult values. Counter-topspins become more efficient and easier to play, even if you fail to hit the ball at its highest point. Ball trajectory remains flat enough to make it arrive even faster on the opponent's side, giving the opponent even less reaction time.

SIMPLY BETTER. BELIEVE IT. GEWO INVENTUS XT PRO.
SHARPEN YOUR GAME!

Inventus XT

- The speed of your rubber should be generated more from the sponge.
- You need a slightly longer contact time at the point of impact for your shots.
- You want to be able to play with high speed and rotation and still have sufficient control.

Nexxus SuperSelect

- You prefer a more direct and compact feel and generate rotation with rather short movements.
- You also introduce more passive strokes into your playing system from time to time, but your rubber must not have a maximum catapult effect.
- Speed and rotation are roughly equally important to you.

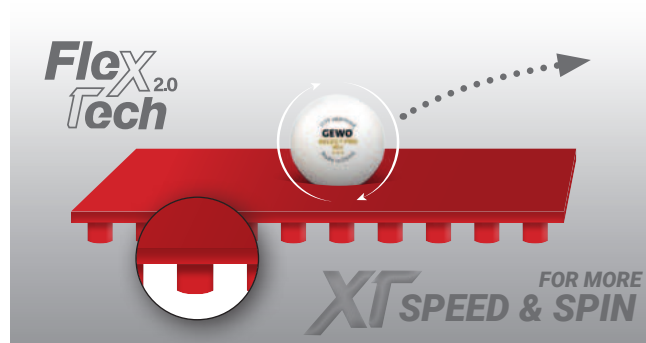

Nexxus

- You need a rubber that enables maximum acceleration through mostly short movements.
- Your rubber must always couple reliably and offer optimum energy transfer in every situation.
- Speed and rotation should be as high as possible and still be sufficiently controllable.

FLEX TECH 2.0-Technology

THE PIMPLE HEADS IN THE RUBBER ARE ARRANGED AT A GREATER DISTANCE. FOR MORE SPEED. LONGER BALL RETENTION TIME FOR MORE SPIN!

The flexible sponge/rubber design FLEX-TECH 2.0 (XT), crafted specifically for GEWO, demonstrates impressive base speed. Rubbers from the XT series, featuring the H-Touch DGC 40+ 3.0 surface, transform the speed of the opponent's topspin, into self-energy and release it catapult-like when leaving the bat. The pimples on the rubber sheet are arranged further apart and are slightly narrower than on EL rubbers. These rubbers primarily focus on speed.

WELCOME TO THE FUTURE TOMORROW IS NOW

The GEWO Inventus rubber series marks another milestone in the success story of GEWO high-performance rubbers. Thanks to innovative surface technology (Longer Trajectory Touch – LTT) this rubber produces maximum spin plus an incredible feel and the ability to control the ball a little longer, thus extending the ball's trajectory. This enhancement significantly improves ball control and provides optimized feel for the ball in all situations requiring "touch play," all while retaining the speed reserves you need.

HD HUGO DESCHAMPS
European Champion
U21 Double (2023)

GEWO Inventus XT Pro 52.5

OF/OF+

The hard (52.5°) yet dynamic sponge is the prerequisite for maximum power table tennis! This variant focuses clearly on the successful combination of hardness, speed, and feel for all more controlled strokes to set up point-winning finishing shots. The 52.5° hardness power sponge provides speed reserves in all match situations, allowing you to initiate dangerous counter-attacks even from a defensive position. A tendency towards short and dynamic strokes and a high general playing level are prerequisites to unlock the maximum potential of this true offensive powerhouse. Counter-topspins executed at the table or from mid-distance can be effortlessly performed, exerting immense pressure on the opponent with limited reaction time attributed to the flatter trajectory in contrast to softer variants.

- Harder, faster and more direct, yet with the necessary spin and a not too flat trajectory.
- Ideal for players who operate close to the table and want to deprive their opponents of time for dangerous counter-attacks through quick and short arm movements.
- Perfectly suited for players who need a hard and dynamic sponge for their „counter-spin oriented“ game, but cannot compromise on the best possible control and brilliant touch.

Speed: 135, Control: 82, Spin: 123
Thickness: 2,0 / Max
Sponge hardness: 51,9° – 54,4° / hard

Item no.: 11477 € 59.90

PLAY RESPONSIBLE

GEWO Inventus XT Pro 50.0

OF/OF+

The GEWO Inventus XT Pro offers a more compact and direct feel with its 50° hardness variant compared to the 47.5° hardness version, yet still allows for controlled and spin-oriented play when necessary during a match. The power-loaded sponge enables quick transitions into all offensive strategies and, thanks to the combination of DETT technology and LTT technology, always provides the necessary control and spin values to stay in control of the game and determine the course of play.

- Ideal for swiftly transitioning from more passive strokes to point-winning attacking.
- Great for players who need a harder sponge for their attacking but still seek maximum touch and spin.
- Perfect for players aiming to seamlessly integrate speed, spin, and touchplay for optimum performance.

Speed: 132, Control: 85, Spin: 125

Thickness: 2,0 / Max

Sponge hardness: 48,9°– 51,4° / hard

Item no.: 11476 € 59.90

GEWO Inventus XT Pro 47.5

OF-/OF

In its 47.5° hardness variant, the GEWO Inventus XT Pro becomes a true all-rounder in the OFF domain. High speed, dynamic spin arcs, and high control values make every player's heart race, particularly those who don't want to compromise on a medium-hard feel for their attacking strategies. The optimized combination of a relatively compact power sponge with the flexible and highly grippy top rubber elevates topspin and counter-topspin strokes to a new level. Benefit from longer ball contact time and added control, giving your strokes more quality and enjoyment.

- For players in search of high speed and dynamic spin arcs, while also placing value on perfect ball coupling.
- For players who want to control the game both close to the table and at mid-distance.
- Ideal for players who seek an absolute power sponge for the hardness they require in their strokes but don't want to compromise on a flexible top rubber.

Speed: 128, Control: 88, Spin: 127

Thickness: 2,0 / Max

Sponge hardness: 46,3°– 48,8° / medium hard

Item no.: 11475 € 59.90

READY? SET? GO!

QA **QUADRI ARUNA**
Worldranking
No. 22 (04/2024)

SuperSelect stands for carefully selected processing quality, constant playing features and characteristics, and lasting speed and spin ratings. A special gluing and production method ensures that our SuperSelect rubbers meet the high demands by professional players like Quadri Aruna (ranked top 22 in the world). Players who can handle the speed and excellent energy transfer will enjoy this new attacking weapon which leaves nothing to be desired. High-speed, spin-loaded attacking and counterattacking will come easy and almost without effort thanks to the two technology innovations Super Select Transmission Tec (SSTT) and Optimized Trajectory Tec (OTT) which form the basis of GEWO's new offensive masterpieces. GEWO's new ProPlayer level high-end rubber for players on their way to the top!

The 50° version for uncompromising power table tennis!

GEWO Nexxus EL Pro 50 SuperSelect OF++

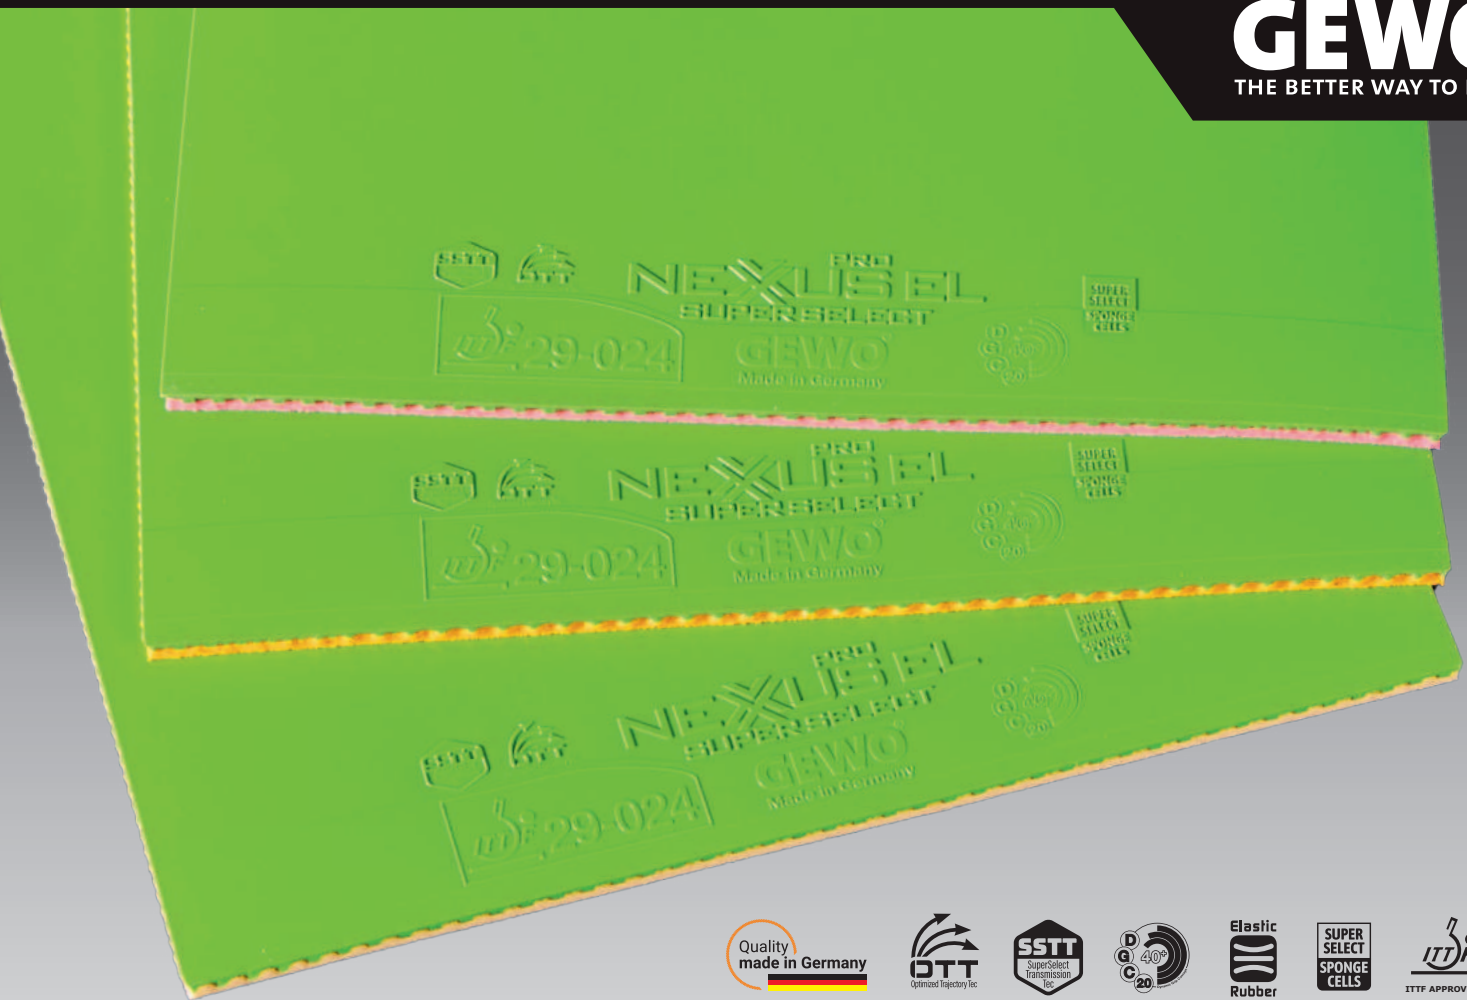

The 50° version for uncompromising power table tennis OFF power package for players looking for a hard rubber offering ultimate spin and speed ratings. Thanks to the built-in SST and OTT technology innovations, GEWO Nexxus EL Pro 50 SuperSelect is direct, precise and very linear. The special top-sheet and sponge gluing system will give you all the variability you need for controlled power play. Hard, but still flexible enough to stay in control. Fine-tuning at its best for a perfect balance of fine touch and power.

- For attackers who still want to attack with sufficient variability with a hard rubber
- Maximum catapult, spin and highest tempo values with a rubber in the hard range
- Offensive power and dynamics for table tennis at pro player level

Speed: 137, Control: 83, Spin: 126
Thickness: 2,0 mm / maXimum
Sponge hardness: EUR 48,9°-51,4° // JP 37°-39° / hard

Item no.: 10983 € 64.90

GEWO Nexxus EL Pro 53 SuperSelect **OF++**

The ultimate choice for your offensive play. Maximum dynamics and speed ratings close to the feasible limit will help you play to your full potential. Workmanship and performance in Select quality. As the first GEWO rubber featuring the combination of our SSTT and OTT technologies, GEWO Nexxus EL Pro 53 SuperSelect is more elastic and flexible than you would expect considering the enormous hardness of its sponge. However, it still provides for ultimate speed, optimum ball contact and maximum spin. Ideal for close-to-the-table power play relying on short and explosive arm action.

- For attackers aiming at winning quick points using all modern, offensive stroke techniques.
- Maximum catapult, spin and ultimate speed for a rubber of the hard sponge segment.
- Uncompromising OFF power and dynamics for table tennis on Pro Player level.

Speed: 140, Control: 77, Spin: 127
Thickness: 2,0 mm / maXXimum, Sponge hardness: EUR 51.9° – EUR 54.4° // JP 39.5° – 41.0°/maXXimum hard

Item no.: 10562 € 64.90

GEWO Nexxus EL Pro 48 SuperSelect **OF+**

The smallest details make the difference – the ultimate solution for your play. This SuperSelect variant is slightly more flexible and variable; it is the perfect choice for players looking for medium-hardness rubbers with maximum performance. The highly tacky top rubber sheet and the power-loaded sponge in combination with the special gluing technique guarantee maximum speed and spin ratings and still provide sufficient control for passive playing situations. Players feeling comfortable in mid-distance rallies in addition to close-to-the-table situations will enjoy GEWO Nexxus EL Pro 48 SuperSelect and the clear, powerful sound it produces when you hit the ball perfectly.

- Ideal for spin-oriented players with good technique.
- Maximum catapult, spin and ultimate speed for a rubber of the medium-hard sponge segment.
- Powerplay from mid-distance and close to the table without loss of speed and control.

Speed: 134, Control: 88, Spin: 126
Thickness: 2,0 mm / maXXimum, Sponge hardness: EUR 46.3° – 48.8° // JP 35.5° – 37.0°/medium hard

Item no.: 10563 € 64.90

GEWO Nexxus EL Pro 45 SuperSelect **OF/OF-**

Precision to its fullest with every stroke – the ultimate spin machine. The medium variant of the Nexxus SuperSelect series not only offers high speed, catapult and excellent spin ratings but it is also great fun to play. Thanks to the combination of our SSTT and OTT technologies, the elastic sponge allows the ball to sink into the rubber thus increasing the dwell time of the ball and providing for excellent control at still high-speed ratings. A perfect symbiosis of performance, spin and control will give you the confidence you need to put your opponent under pressure with your variable top spin play.

- Ideal for variable attacking styles relying on topspin variants from any position.
- Maximum catapult, spin and ultimate speed for a rubber of the medium sponge segment.
- Spin-oriented all-round/off players making high demands on performance, sound and fun.

Speed: 128, Control: 95, Spin: 124
Thickness: 2,0 mm / maXXimum, Sponge hardness: EUR 43.8° – 45.8° // JP 33.5° – 35.0°/medium

THE BEST CHOICE

To break the rules, you must first master them! The rubber series for top players and players enjoying uncompromising power rubbers. Commitment to continuous improvement, excellent performance and outstanding quality have always been core values of the GEWO tradition.

GEWO Nexxus XT Pro 50 Hard

OF++

Even more power, more dynamics – Full steam ahead! The power pack of the Nexxus series with great dynamics and flat trajectories also received an update in respect of power, catapult effect and feeling. The result is a rubber which leaves nothing to be desired as regards speed and attacking power.

- The ideal partner for players preferring straight and fast playing.
- Flat and dangerous trajectories which will give your opponent no rest.
- Pure dynamics and direct energy transfer for all modern, close-to-the-table stroke techniques.

Speed: 132, Control: 85, Spin: 121
Thickness: 2,1 mm / maXXimum
Sponge hardness: 50° | hard, JP 37,4 - 38,9°

Item no.: 9168 € 56.90

GEWO Nexxus EL Pro 53 Hard

OF++

Faster and harder – GEWO Nexxus EL Pro 53 Hard! Perfect for ambitious and high-performing players with fast and short-range stroke movements preferring close-to-the-table playing and looking for a point-winning combination of maximum speed and spin.

- An absolute power pack for uncompromising, close-to-the-table attacking.
- Ideal for players using short and fast arm movements who need maximum speed for their play.
- For hardworking players with good technique. Maximum power for perfect acceleration of the ball.

Speed: 133, Control: 83, Spin: 124
Thickness: 2,1 mm / maXXimum
Sponge hardness: 53° | maXXimum hard, JP 39,5 - 41°

Item no.: 9167 € 56.90

GEWO Nexxus EL Pro 50 Hard

OF++

The perfect weapon for uncompromising attacking! The grippy and flexible top rubber sheet still enables spin loaded strokes from any distance and speed variations. However, with GEWO Nexxus EL Pro 50 Hard you can benefit from the additional power of the more compact sponge (hardness 50°). Put your opponent under non-stop pressure.

- Made for next-level speed and spin
- Linear and reliable coupling of the ball and perfect energy transfer.
- Power, Spin and feeling for table tennis brought to perfection.

Speed: 130, Control: 87, Spin: 125
Thickness: 2,1 mm / maXXimum
Sponge hardness: 50° | hard / JP 37,4 - 38,9°

Item no.: 9166 € 56.90

THE POWER PACKAGE

GEWO Nexxus EL Pro 48

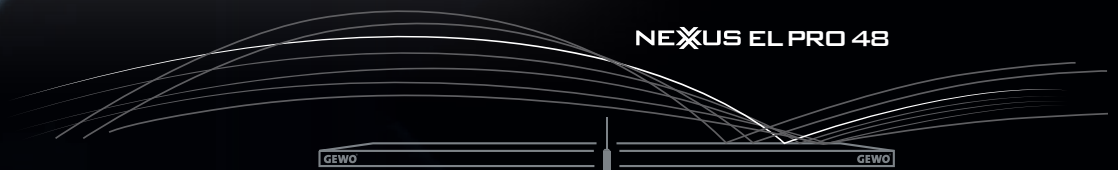

OF

The ultimate solution. Details matter.

- The spin-offensive power package in the GEWO Nexxus Pro series: fantastic feel and direct feedback.
- Spin-oriented, explosive-flexible, grippy DGC40+ 2.0 top rubber sheet with extremely good coupling features – in short: the perfect partner for high-performing players.
- For players who are looking for a reliable partner in maXXimum performance situations and try to win their points through powerful, active playing. Strengths: variable, modern, spin-offensive power table tennis!

Speed: 125, Control: 91, Spin: 124
Thickness: 1,9 / 2,1 mm / maXXimum
Sponge hardness: EUR 46,3° – 48,8°, JP 35,5° – 37,0° / medium+,

Item no.: 8672 € 54.90

NEXXUS EL PRO 48

OF+

Powerful. Made for Speed.

- Unbelievable reliability for passive strokes used in modern serve/return situations, blocking and flips.
- Flat and direct trajectory characterize this power package.
- Attacking rubber with optimized speed and catapult features, unfolding its full strength and power when taking it to the limit. Uncompromising attacking power!
- Ideal for modern attackers relying on dynamic, speed-focused, close-to-the-table and mid-distance topspin playing.

Speed: 126, Control: 90, Spin: 123,
Thickness: 2,1 mm / maXXimum
Sponge hardness: EUR 46,3° – 48,8° // JP 35,5° – 37,0° / medium+

Item-No. 8671 € 54.90

GEWO Nexxus EL Pro 43

OF

Great play. Perform at your best.

- High trajectory, less proneness to faults when taking your play to the limit; with its 43° medium-hard spin-focused EL sponge, it is a true all-rounder in the Nexxus Pro series.
- Ideal for modern offensive players preferring, elastic materials for their variant-rich playing styles.
- For players aiming at winning their points through precise ball placement and spin variants rather than through maximum end speed.

Speed: 118, Control: 96, Spin: 128
Thickness: 1,9 / 2,1 mm / maXXimum
Sponge hardness: EUR 41,3° – 43,8°, JP 31,5° – 33,0° / medium

Item no.: 8673 € 54.90

GEWO Nexxus EL Pro 38

OF-

What a feeling. Precision at its best.

- Focused progress for your play: Precision, fantastic touch and sound effect, great forgiveness.
- Experience dynamic sound for great playing fun. Suitable for players of all classes who prefer soft rubbers, but still rely on speed.
- For players focusing on spin-rich and precise placement. In short: a 38° soft "Sound Monster" with the right speed at the right time.

Speed: 109, Control: 101, Spin: 127
Thickness: 1,9 / 2,1 mm / maXXimum
Sponge hardness: EUR 36,3° – 38,8° • JP 27,5° – 29,0° / soft

Item no.: 8674 € 54.90

GEWO Codexx EL Pro 55 SuperSelect

OF++

The hardest sponge in the GEWO rubber range so far was combined with a tacky-elastic top sheet to develop an ultimate power package with unbelievable attacking strength. Thanks to the successful combination of the advantages of the Codexx and SuperSelect rubber designs, uncompromising attackers will be able to produce flat, spin-loaded, difficult-to-block topspins with dangerous bouncing characteristics on the opponent's side. With the sophisticated top-sheet / sponge gluing technique used in the production of this rubber, GEWO Codexx Pro 55 SuperSelect is still controllable and elastic enough for powerful, close-to-the-table power attacking with more than enough counter-spin variability.

- Maximum hardness and speed for uncompromising power-play
- Hard and precise strokes and vicious spin for players favoring very hard and fast rubbers with slightly tacky top sheet
- A perfect combination of European and hard Asian rubber designs

Speed: 143, Control: 75, Spin: 129, Thickness: max, Sponge hardness: 55° / hard+

■ Item no.: 10985

€ 62.90

GEWO Codexx EL Pro 53 SuperSelect

OF/OF+

Dynamic hardness, maximum speed and vicious spin. GEWO Codexx Pro 53 SuperSelect is a powerful and reliable weapon for uncompromising close-to-the-table players. The feedback we received from our GEWO Pro Players was more than enthusiastic as regards the power and attacking options the rubber offers. In addition, all players reported that the rubber still provides for excellent control for a rubber this hard. Thanks to the unique combination of Codexx and SuperSelect rubber designs, the GEWO Codexx Pro 53 SuperSelect performs at its best in powerful close-to-the-table topspin rallies and even from mid-distance.

- Maximum dynamics and ultimate speed for variable power play
- Hard and precise strokes and vicious spin for players favoring rubbers with slightly tacky top sheet
- A perfect combination of European and harder Asian rubber designs

Speed: 140, Control: 77, Spin: 130, Thickness: 2,0 / max, Sponge hardness: 53° / hard

■ Item no.: 10986

€ 62.90

THE ULTIMATE POWER PLAY

The GEWO Codexx rubber series is designed as a perfect combination of European and Asian rubbers. It combines a dynamic, hard sponge with a slightly tacky, but still flexible top sheet (ARC-HIT Technology). The new GEWO Codexx rubbers are made for dangerous, point-winning close-to-the-table playing and produce tons of power and spin. Compared to the popular Nexxus Hard series, the new Codexx rubbers produce even more rotation, thanks to the slightly tacky top rubber sheet. Due to a longer dwell time (ARC-HIT Technology), they also provide for more control in over-the-table situations. The key to ultimate power play with hard sponges and tacky top sheet.

GEWO Codexx EL Pro 52

OF-/OF

Designed especially for explosive, close-to-the-table playing styles relying on short-range and quick movement, the Codexx EL Pro 52.0 (Elastic Power) offers spin, speed, and stability combined with low ball bounce and all the control you will need to find the right answers even in situations when you are under high pressure. This rubber will reveal its full strength in attacking situations, while it still provides more than enough control and feel for spin-rich serves and short stops. This rubber has got everything you need for modern power table tennis.

- Excellent spin ratings for opening topspins against backspin with dangerous trajectory
- Perfect ball coupling in all strokes, no slipping, no uncontrolled bouncing.
- Hard close-to-the-table topspins and counter-topspins plus more than enough power for mid-distance rallies
- Power, stability, and spin for uncompromising close-to-the-table attackers relying on rather short-range and explosive movements and high-speed arm action.

Speed: 135, Control: 81, Spin: 128, Thickness: 2,0 / max, Sponge hardness: 52° / hard

■ Item no.: 10300

€ 49.90

GEWO Codexx EF Pro 54

OF/OF+

Compared to the EL Pro 52 version, the GEWO Codexx EF Pro 54 (Explosive Friction) combines a slightly harder and more compact sponge with a moderately tacky top sheet. It is the perfect weapon for uncompromising, close-to-the-table attackers. EF Pro 54 stands for high-speed power spin and unstoppable attacking. This is just the ideal rubber for hard-working attackers. It is not made for players who haven't yet perfected their technique. Ultimate hardness combined with good control and great spin is all any determined attacker will need.

- GEWO's latest power package for unlimited close-to-the-table power
- Uncompromising attackers relying on explosive, high-speed play will definitely want to give this innovative weapon a try.
- Toxic serves, flat and spin-rich topspins, plus maximum power
- For hardworking players with a good technique who love the direct and linear feel of hard sponges with tacky top sheets.

Speed: 137, Control: 79, Spin: 127, Thickness: max, Sponge hardness: 54° / hard

THE NEW DIMENSION ECO GRIP FOR YOUR MATCH

GEWO Elaxxon eFT 50.0

OF+

The harder version provides a more direct playing feel, higher speed values, and still enables excellent control for any kind of attacking strokes. For those seeking a balanced offensive rubber that remains reliable in all game situations, the 50° hardness sponge version of the GEWO Elaxxon eFT is the ideal companion for successful gameplay.

- eGrip provides increased rotation and control values without resulting in unmanageable susceptibility to spin.
- With the 50° hardness sponge version, even better attacking options are available while maintaining the pleasant and flexible playing feel.
- Ideal for players seeking a moderate offensive rubber that prioritizes ease of play.

Speed: 107, Control: 93, Spin: 118
Thickness: 1,9 / 2,1 / Max
Sponge hardness: 48,9° – 51,4° / hard

■ ■ Item no.: 11373

€ 41.90

The globally successful introduction of NEAS sponges (New Efficiency Active System), combined with the proven eTec (Eco Boost) technology, has made the GEWO Neoflexx series an absolute bestseller in the category of versatile, easy-to-play rubbers that aren't too fast.

The overwhelmingly positive feedback has inspired us to develop a new generation of rubbers that offer even higher speed and spin values without neglecting the focus on ease of play and controllability. Especially younger players or those wishing for a bit more speed and variation without sacrificing too much control will enjoy the new variants. Countless hours of testing and meetings resulted in a rubber composition that stands out: **GEWO Elaxxon eFT**.

One key factor contributing to the successful launch of GEWO rubbers was the development of the innovative DGC40+ surface technology which stands for consistent and reliable coupling at the ball contact point. In addition, thanks to its grippy surface structure it prevents the ball from "slipping". With the introduction of the latest ball generations (e.g., GEWO Select Pro 40+ ***), further development and adjustment of the surfaces are essential. The DGC40+ "Dynamic-Grip-Concept" 2.0 was born. The surface was developed and refined specifically for the requirements of the latest ball generation. There's no stopping now!

"eco(nomic) boost for your match" was clearly at the heart of this rubber series. The centerpiece of this generation was the perfect combination of a flexible-dynamic sponge with a grippy surface and a newly arranged pimple structure. For the harder rubbers (45° / 48° / 50°), the focus was on speed (eSpeed), without sacrificing control. For the softer rubber (40°), the focus was on spin. eGrip / eSpeed / eSpin - optimum performance in the game.

The new key to success with speed, spin, and fun! Benefit from reliable ball coupling, high control, and spin values in every match situation, enhancing the quality and stability of all your strokes. The new eGrip technology makes you the master of rallies!

GEWO Elaxxon eFT 45.0

OF

The slightly softer version of the GEWO Elaxxon eFT sponge provides a comfortable and flexible feel, ensuring you have the necessary response in every rally. The moderate speed gives you the confidence to shine both in passive and active situations. The fine tuning of the 45° hardness medium sponge with the flexible top rubber allows offensive all-rounders and ambitious young players to fully utilize their potential.

- eGrip provides increased spin and control values without excessive susceptibility to spin.
- With the 45° hardness sponge version, even better all-round offensive options are available while maintaining the pleasant and flexible playing feel.
- Ideal for players seeking a moderate and not too hard offensive rubber that effectively supports all strokes in their repertoire.

Speed: 104, Control: 96, Spin: 115
Thickness: 1,9 / 2,1 / Max
Sponge hardness: 43,8° – 45,8° / medium

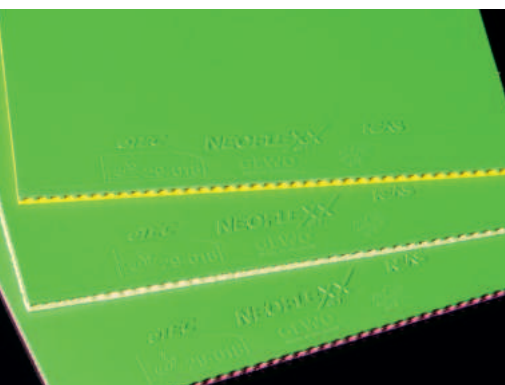

■ ■ Item no.: 11374

€ 41.90

ECO BOOST FOR YOUR MATCH

*In order to really perform at your very best, you will have to find the right rubber first. Fortunately, there is a simple choice for optimum performance – **GEWO Neoflexx eFT**. The new standard package solution is the perfect combination of versatility, playability and great forgiveness. Eco boost (eTec) is at the focus of this rubber series. eTec guarantees accurate placement, fun and control in all situations – available variants: eFT 48, eFT 45 and FT40. One thing about rubbers became very clear in the many product meetings and test series involving our GEWO coach team: It is not the fastest rubber that makes a champion. “It is as simple as that: In order to succeed, you just need a rubber you can rely on in any situation to win more points than your opponent”. This rubber series provides you with everything you need at an excellent cost/performance ratio.*

NEAS
New Efficiency
Active System

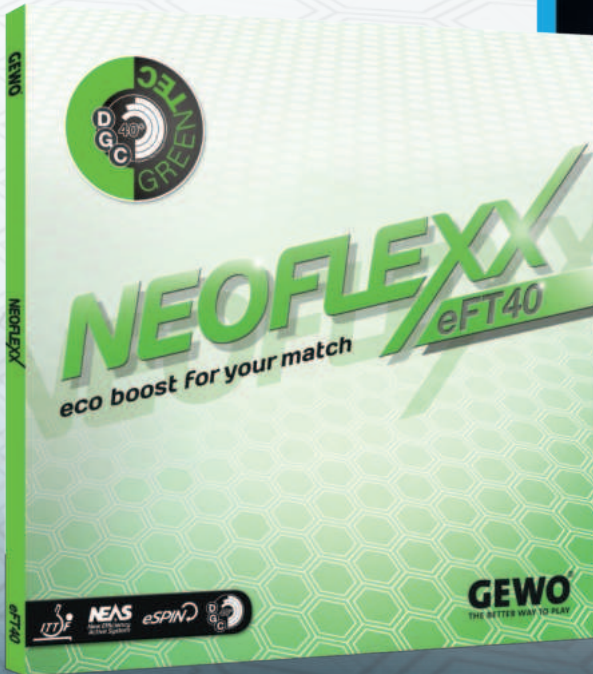

eSPIN
eSPEED

NEAS: “New Efficiency Active System” – unerringly accurate. The newly developed NEAS sponge provides for sufficient speed in all offensive strokes – however, it’s control that this series primarily focuses on. Suitable for players of all classes.

eSpeed / eSpin Technology: “eco(nomic) boost for your match” is the motto of this rubber series. This rubber generation is based on a perfect combination of a newly developed sponge with a grippy surface and new pips arrangement. The harder rubbers (45° and 48°) focus on speed (eSpeed) – the softer rubber (40°) on spin. eSpeed / eSpin – perform at your best. GEWO Neoflexx eFT – expect more!

DGC40+: The proven DGC40+ “Dynamic Grip Concept” guarantees uniform, reliable coupling of the ball when it hits the bat, its new surface texture prevents the (poly)ball from “slipping” and energy losses when the ball leaves the rubber. The surface was specially developed for and adjusted to the new requirements of the poly ball.

GEWO Neoflexx eFT 40

AR+

GEWO Neoflexx eFT 45

OF-

GEWO Neoflexx eFT 48

OF

The all-rounder in GEWO's eco-boost series. For players searching for the ideal combination of the advantages and control of "classic rubbers" and the features of Tensor based high-performance rubbers. This is exactly what GEWO's eco-Boost provides: moderate speed for topspin attacking, a soft and elastic top rubber sheet and great reliability and control. The soft eSpin-Technology of GEWO Neoflexx eFT 40 guarantees optimum ball control and longer ball contact time for optimum control and forgiveness. Control of the game, that's what this rubber is made for. However, it still has more than enough power for dangerous topspins and smash shots.

- Great for chopping and blocking, spin-absorbing NEAS sponge for optimum reliability and control.
- In your own attacks, the grippy DGC40+ top rubber sheet displays its strengths for high accuracy and precision.
- Perfect rubber for "newbies" in the GEWO Tensor world: For players of all performance classes aiming at improving their techniques and skills through hard work supported by the advantages and dynamics of modern rubbers

This economic Tensor rubber features the grippy and transparent DGC40+ surface which has already proved a great success and the new NEAS sponge. GEWO Neoflexx eFT 45 comes with a very grippy, medium hardness DGC40+ top rubber sheet providing you with great grip and dynamics thanks to "Dynamic-Grip-Concept" as well as all that you need for modern table (high trajectory, extraordinary ball rotation and a wide range of spin and stroke variations). The eco-Boost package offers a perfect spin/speed ratio, high versatility and ensures, thanks to the DGC40+ top rubber sheet, high reliability and consistent playing characteristics.

- eco(nomic) boost has high spin ratings, absorbs arriving spin, thus offering great reliability and control.
- Despite the 45.0° NEAS sponge this rubber provides you with all the feel and control you need.
- Perfect for players of all classes relying on offensive all-round play!

More feel, longer ball contact time and higher spin ratings are the key features of the economic-Tensor rubber GEWO Neoflexx eFT 48. Since the introduction of the new balls, many players have been looking for a new rubber meeting their special requirements: To meet this demand, we developed a new rubber featuring the new DGC40+ surface technology with a grippier surface texture for significantly more adhesion of the ball for more spin – a must-have in modern table tennis. The new pink NEAS sponge provides for sufficient speed in all offensive strokes. Thanks to the new pips geometry and the 48° hardness GEWO sponge, the rubber perfectly adjusts to the ball contact thus ensuring power (eSpeed) and grip (DGC40+) in all situations.

- For dynamic, spin-relying offensive players focusing on topspin attacking but still requiring sufficient control in over-the-table or passive playing situations. The GEWO Neoflexx eFT 48 opens up a whole new dimension of table tennis fun.
- Speed and spin can be varied and controlled just perfectly – the precision of placement is impressive! Great control in serve-and-return situations.
- Ideal for players who would like to try something different than classic rubbers and haven't switched to Tensor yet, but now need more speed and dynamics in their play to cope with the 40+ ball without losing control and reliability.

€ 54.90

**Flex
Tech**

GEWO Hype XT PRO 40.0

OF-

- The built-in FLEX-TECH energy produces maximum spin in all strokes.
- Forgiving soft high-end rubber supporting variant-rich, effective Power/All-round playing styles.
- For players looking for a rubber featuring elasticity as well as high end speed.

Speed: 113, Control: 105, Spin: 124
Thickness: 1,9 / 2,1 mm, Sponge hardness: 40,0° | soft/medium-

Item no.: 7765

€ 54.90

**Flex
Tech**

GEWO Hype KR PRO 47.5

OF+

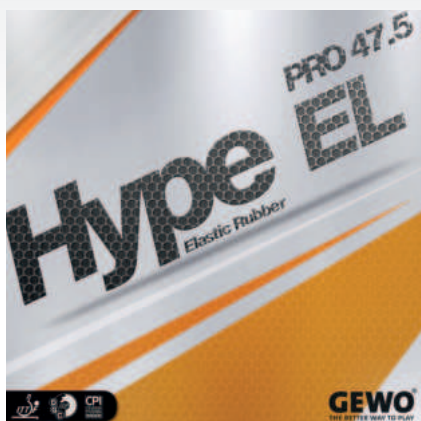

- For spin-relying attackers looking for maximum power and spin. For players who are willing to do the training work required.
- Super-dynamic, new pink GEWO sponge with spinny top rubber sheet.
- Most dynamic Hype Series rubber besides GEWO Hype XT PRO 50.0.

Speed: 124, Control: 92, Spin: 121
Thickness: 2,1 mm, Sponge hardness: 47,5° | hard

Item no.: 8174

€ 54.90

**KOREAN
VERSION**

GEWO Hype EL PRO 47.5

OF+

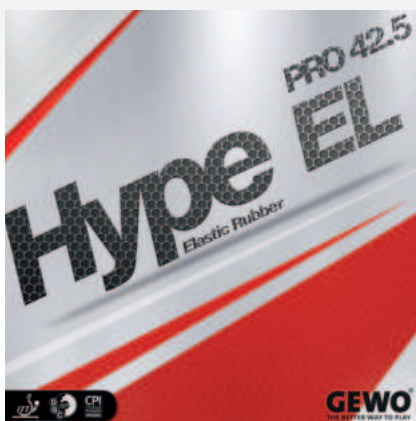

- The fastest and most dynamic rubber of the Hype EL Pro Series
- The ultimate playing experience of effective power transmission and total forgiveness
- The perfect combination of explosive power spin and an extreme increase in speed

Speed: 122, Control: 92, Spin: 120
Thickness: 2,1 mm, Sponge hardness: 47,5° | hard+

Item no.: 7493

€ 53.90

**Elastic
Rubber**

GEWO Hype EL PRO 42.5

OF

- The GEWO Hype EL PRO 42.5 is the tempo-elastic middle rubber of the GEWO Hype EL Pro Series
- A rubber with exceptional speed in reserve, but despite the high speed, allows good control in the more passive strokes when driving blocking, or pushing
- The perfect rubber for players who want maximum spin at high speeds

Speed: 115, Control: 97, Spin: 120
Thickness: 1,9 / 2,1 mm, Sponge hardness: 42,5° | medium+/hard

Item no.: 7494

€ 53.90

**Elastic
Rubber**

**Flex
Tech**

FlexTech: The flexible sponge/rubber design FLEX-TECH (XT) which was specially developed for GEWO, produces impressive speed.

Rubbers from the XT series, combined with the DGC40+ 2.0 top sheet, transform the speed of your opponent's topspins into energy and release this energy again in your own stroke when the ball leaves your bat. The pimple heads in the rubber are arranged at a greater distance from one another, and they are slightly thinner than in EL rubbers. These rubbers primarily focus on speed.

**Elastic
Rubber**

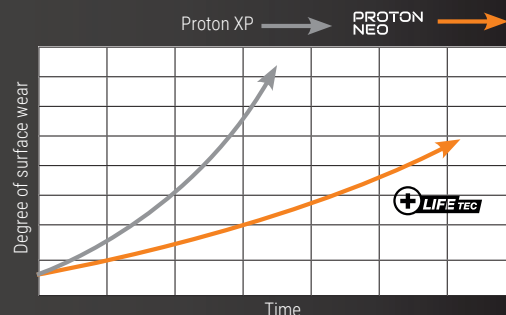

Elastic Rubber: The EL rubber (Elastic Rubber), despite its compactness provides for great ball contact feedback and a unique feel. All rubbers of this series are made for spin. The pimple heads in the rubber are arranged at a smaller distance from one another, and they are slightly thicker than in EL rubbers. When it comes to generating spin, the DGC40+ 2.0 top sheet unfolds its true strength (highly reliable coupling and maximum spin), as it provides for a slightly larger contact area upon ball contact. Enjoy a new experience!

NEW, FRESH AND YOUNG

Any improvement matters, because every single point can make the difference.

The Proton-XP has been a successful member of the GEWO product family for many years. It has become a real classic for many players of all performance classes. However, „If you don't go forward, you go backwards“, especially in the highly complex world of table tennis rubber design. Now, the story of success is continued. The international GEWO material experts set out with the goal of combining the proven Proton feel with the demands of modern table tennis. The result is a modified high-end product:

The GEWO Proton Neo series.

GEWO Proton Neo 475

OF

- For dynamic attackers who prefer direct and precise energy transfer into the ball and rely on a good feel
- Whether in offensive topspin play, over-the-table pushing or in passive playing situations, Proton Neo 475 will take your play to a new dimension of fun
- Speed and spin can be varied and controlled just perfectly – the precision of placement is impressive!

Speed: 113, Control: 95, Spin: 104, Thickness: 2,2 mm, Sponge hardness: 47,5° | hard

Item no.: 8173

€ 42.90

GEWO Proton Neo 450

OF

- Best-of-class dynamics, high speed potential – you will feel the potential after just a few strokes.
- Despite the 45,0° sponge, it provides for great feel and control.
- The top rubber for all ambitious players with the highest demands on their equipment.

Speed: 108, Control: 96, Spin: 105, Thickness: 2,0 / 2,2 mm, Sponge hardness: 45,0° | medium+

Item no.: 7757

CHOOSE A RUBBER THAT SUITS YOU

GEWO Mega Flex Control

AR+

- The high capacity rubber for all all-round strategists Mega Flex control gives you a super ball feeling due to long ball contact.
- Mega Flex control is developed especially for controlled, modern all-around player. With a thicker sponge (1.6/1.8 mm) it is suitable for a controlled offensive strategy (especially for blocking, counter attack and final shots, with a thinner sponge (1.3 mm) for controlled playing strategy (driving and disordering).
- Due to the high controlling data the own faults quota is drastically subsiding.

Speed: 88, Control: 99, Spin: 97

Thickness: 1,3 / 1,5 / 1,8 / 2,0 mm, Sponge hardness: 40,0° | medium

■ ■ ■ Item no.: 1460

€ 37.90

GEWO Return Pro

AR+

- Developed for the modern all-round plus player who wants controlled top-spin play.
- This rubber for mid-level players allows you to play every type of stroke. The soft, forgiving sponge reduces the catapult effect, so that all-round players can play with medium speed and strong spin while having utmost control.
- The sponge, combined with the very tacky surface, gives excellent feel even when playing slightly away from the table.
- The 2.0mm version enables you to play a very spinny, precise and controlled offensive game, while the 1.8mm and 1.6mm versions provide optimum control at medium speed.

Speed: 89, Control: 99, Spin: 102

Thickness: 1,6 / 1,8 / 2,0 mm, Sponge hardness: medium

THE RUBBER FOR ALLROUND STRATEGISTS!

HALLMARK Mega Spin Control

AR/OF

HALLMARK Mega Spin Control offers excellent control thanks to a longer ball contact time. It absorbs the spin of the arriving ball and unfolds its own tremendous spin potential with controlled power for ultimate reliability in any match situation. HALLMARK Mega Spin Control was specially designed to meet all requirements of controlled modern allround playing styles. With the thicker sponge varieties (1.5/1.8/2.0 mm), HALLMARK Mega Spin Control is ideal for controlled attacking (especially for blocks, counterattacks and smashes) while the thinner sponge varieties (1.3 mm) offer great opportunities for passive playing strategies (backspin and spin variants). This rubber supports players relying on smart tactics without compromising the reliability of your standard stroke repertoire. Thanks to the high control ratings, HALLMARK Mega Spin Control is very forgiving and will reduce the number of unforced errors significantly. This rubber will never let you down in any match situation.

HALLMARK Confusion-LP

DEF/AR

The perfect choice for variable long pips-out playing styles! Thanks to the new flexible rubber mixture, this rubber not only produces great spin for away-from-the-table defending, but also excellent pips-out effects and ball trajectories in close-to-the-table situations which will be very annoying to your opponents. HALLMARK Confusion-LP owes its strengths to a pips length close to the allowable limits combined with the advantages of high-grip pimple heads. The effects of this unique combination will be more than confusing to your opponents.

HALLMARK Clutter-LP

DEF/AR+

His strengths lie in variable (block) play. HALLMARK Clutter-LP features thin medium-hardness long pimples combined with almost tacky high-grip heads to produce low and dangerous ball trajectories. HALLMARK Clutter-LP unfolds its full potential in variable close-to-the-table (blocking) situations with confusing trajectories and early-falling balls which will present a serious problem to your opponents.

HALLMARK Tactics-LP

DEF/AR

Tactics LP is probably the most spectacular material innovation launched by HALLMARK in the past few years. Tactics LP is a long pips-out rubber especially designed for the ABS plastic ball, featuring unbelievable pips-out effects for highly dangerous, hard-to-return balls. The pips are as long as permitted by the ITTF rules and regulations, and they are also exceptionally wide. This guarantees incredibly low ball bounce, the ball will drop down very quickly once it is over the net.

THE SPECIALIST FOR ALL MATERIAL PLAYERS

XIAOXIN YANG
Worldranking
No. 49 (04/2025)

HALLMARK Devil-Anti

DEF/AR+

Hallmarks Devil Anti isn't really a classic anti-rubber. In addition to excellent anti-effect, this rubber also enables very controlled attacking. Devil Anti reveals its full strength when it comes to blocking. With this rubber, you will be able to return even the hardest top-spins. Players relying on classic defending and surprising dangerous mid-distance attacking may definitely want to give Devil Anti a try, not least because even hobby players can handle the rubber without a lot of practice thanks to the exceptionally high control ratings. Hallmark Devil Anti is THE rubber for anti-spin players who act close to the table and use their anti-material for surprising attacking.

DISCOVER THE MATRIXX – PRECISION THAT INSPIRES.

Your game, your blade, your success!

The GEWO Matrixx blades are the ideal choice for ambitious table tennis players who want to combine maximum precision with explosive power. Thanks to innovative fiber lamination with epoxy resin, these blades offer outstanding ball control while delivering the dynamics of modern carbon blades. A system of interconnected individual factors (Matrixx) is used as a molded part to optimally support the fibers and distribute the forces acting on the part across them. This results in a consistent and dynamic ball bounce – without sacrificing hitting energy.

SERIES**

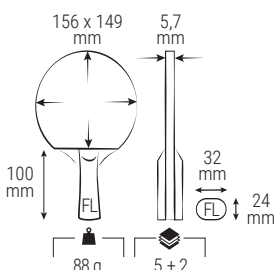

DESIGNED & DEVELOPED
BY GERMAN ENGINEERS

GEWO Matrixx ARC OFF

OF

With its sensitive and relatively soft touch for a fiber-reinforced blade, the GEWO Matrixx ARC OFF is a true gem for players who value not only high speed but also maximum variability. The precisely coordinated wood veneers, combined with the specially applied reactive resin used in bonding, unfold their full potential and create a fantastic playing feel for all modern offensive strategies. A perfect combination of speed and touch – the soft feel on passive shots remains impressively present.

GEWO Matrixx Magic OFF

OF

The GEWO Matrixx Magic OFF stands out due to its particularly interesting veneer composition – and delivers in every playing situation! The use of flexible basswood inner layers, combined with inner UD carbon layers, creates a playing feel usually only found in blades with outer synthetic fiber layers. The highlight: control values have been increased without significantly reducing the speed characteristics. The result is a powerful offensive blade that will captivate the hearts of offensive players with its blend of speed and feel.

Speed: 99
Control: 91

GEWO Matrixx Hybrid ARC Inner OFF-

OF-

The slightly more controlled variant of the Matrixx series features a hybrid aramid-carbon layer that wraps around a softer kiri core veneer. This setup provides excellent support for topspin strategies, and even from mid-distance, this blade enables a forceful offensive game. The outer koto veneers ensure the necessary stability for shots close to the table, while the intermediate ayous veneers give the blade its special touch – and at the decisive moment, it still delivers plenty of power. The Matrixx formula for success: a softer touch and even more control than the GEWO Matrixx ARC OFF, with only minimal loss in speed.

CELEXIS

CELEXIS stands for innovation, the adaptation and optimization of the GEWO blade range to the latest rubber series, and the promise to our customers to develop the right material for every type of player. **CELEXIS** stands for innovation, the adaptation and optimization of the GEWO blade range to the latest rubber series, and the promise to our customers to develop the right material for every type of player. Although the trend in recent years has clearly been toward fiber-reinforced blades, there are still many players who rely on high-quality all-wood blades for their game. GEWO aims to meet these needs as well and has therefore introduced not only two new and innovative fiber-reinforced blades (featuring TPCF fiber) in the Celexxis series but also a 5-ply Allround+ model and a 7-ply offensive model, both entirely without synthetic fibers.

NEW

GEWO Celexxis Fortissimo Carbon OFF

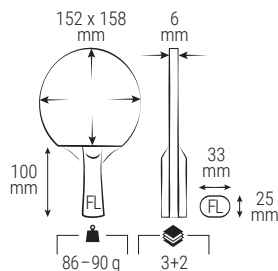

OF/OF+

The fastest blade in the Celexxis series! A thicker Kiri core veneer is encased by the innovative TPCF fiber (Thin Power Carbon Fiber) and completed with two exquisite Hinoki outer veneers. The high base speed is still sufficiently controllable thanks to the sophisticated bonding, allowing players to score quickly, powerfully, and safely. The relatively soft Kiri core veneer provides the necessary ball feel and a moderate ball rebound.

In all offensive situations, the TPCF fiber fully comes into play, while the unique touch of the Hinoki outer veneer makes the GEWO Celexxis Fortissimo Carbon OFF blade the perfect choice for players who want to take control. Whether playing with controlled, spin-loaded strokes or maximum power and speed, the Celexxis composition enables players to dictate the game at any moment.

GEWO Celexxis Hinoki Ex-Carbon OFF

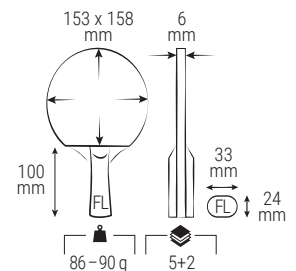

OF/OF+

A premium blade with an exquisite Hinoki outer veneer—sophistication and power combined in one blade! The playing characteristics have been fine-tuned with a slightly stiffer bonding, resulting in a more precise ball rebound. This ensures that even the hardest rubbers in the GEWO range can fully shine. The handle is slightly more angular but still provides a comfortable grip. Additionally, the newly designed transitions to the blade head prevent excessive top-heaviness.

The highlight, however, is the new TPCF fiber (Thin Power Carbon Fiber). It not only enhances stability and speed reserves for offensive strokes but also reduces weight, preventing the racket from becoming too heavy.

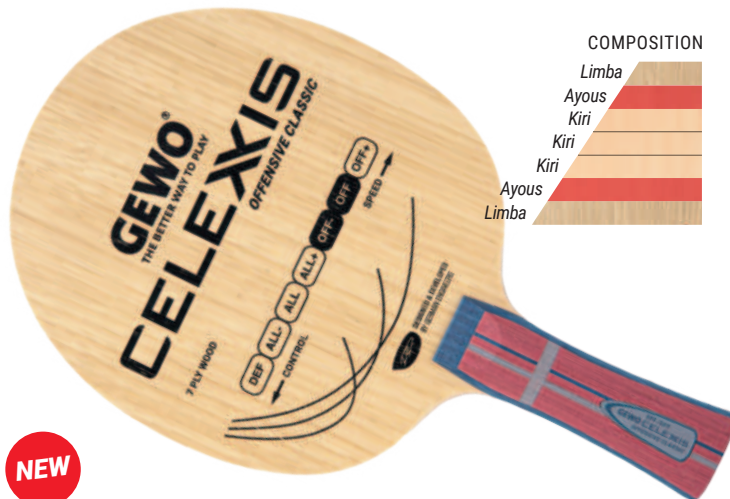

Speed: 103, Control: 89, Handle: FL / ST / PEN

DYNAMICS, PRECISION, INNOVATION

The success story continues! It all started in 2011 with Force ARC Off and the story is now continued with the new GEWO Force series. New compositions and materials were combined to meet the requirements of modern high-performance table tennis. The composition of the popular Force ARC Off remains unchanged while the blades balance has been adapted to the demands made on state-of-the-art table tennis blades.

FORCE

DESIGNED & DEVELOPED
BY GERMAN ENGINEERS

FORCE.
IMPULS.
40+

OUR FLAGSHIP IN TERMS OF DYNAMICS AND CONTROL!

Featuring our innovative Super Hybrid Aramid Carbon Fibre (S-HAC), this blade is an absolute premium-quality powerhouse in terms of speed, acceleration, and control.

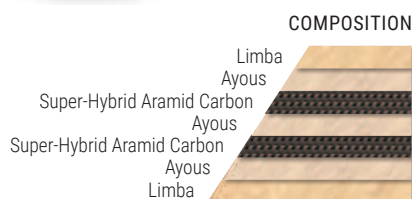

GEWO In-Force S-HAC **OF/OF+**

Thanks to the sturdy S-HAC synthetic fibre, this inner blade enables a slightly longer ball contact time resulting in significantly higher control despite its high speed. GEWO In-Force S-HAC provides a straightforward, linear feel and all the power you need to put your opponents under permanent pressure without losing control.

Speed: 103, Control: 88, Weight: 90 g,
Handle: FL, ST, Veneers: 5+2
Composition: Limba-Ayous-Super Hybrid

Carbon-Ayous-Limba

Item no.: 11031
139.90 €

GEWO In-Force ARC OFF- **OF-**

The Gewo In-Force ARC Off- is a true allrounder! Force ARC's "little brother" comes with the synthetic fibre placed directly on the core ply, which provides for a more flexible and "tame" feel. The harmonic composition of the blade offers new possibilities and variability for spin-oriented attackers, OFF/ALL players and even active players using pips-out/anti-spin rubbers. This modification provides for a flexible feel but, thanks to the carbon fibre, still produces the power you need to compete on the highest level.

Speed: 89, Control: 94, Weight: 84-87 g
Handle: FL, AN, ST, Veneers: 5+2
Composition: Koto-Ayous-Aramid-Carbon-Kiri-Aramid-Carbon-Ayous-Koto

GEWO In-Force PBO-PC OFF **OF**

In this blade, the GEWO material experts, by using PBO-PC fibre for the very first time in a GEWO blade, have succeeded in creating a unique combination of blade features. A blade composition combining stability, speed and feel to obtain a balanced, fairly soft feel, while providing more than enough power reserves for hard strokes. Too good to be true? Not with GEWO In-Force PBO-PC Off!

Speed: 100, Control: 90, Weight: 84-87 g
Handle: FL, AN, ST, Veneers: 5+2
Composition: Limba-Limba-PBO-Power-Carbon-Ayous-PBO-Power-Carbon-Limba-Limba

Item no.: 10671
134.90 €

GEWO Ex-Force PBO-PC OFF **OF/OF+**

When it comes to hardness, precision and feeling, our Ex-Force PBO-PC Off blade simply has no equal. Unlike in the In-Force variant, the synthetic fibre of Ex-Force PBO-PC Off is not placed on the core ply but on the fine Limba outer ply which makes this blade a true weapon of offence. Hard topspins and counter-spins come easy thanks to the new PBO-PC fibre, while the special gluing technique gives the whole blade composition all the control you need even if combined with hard rubbers.

Speed: 106, Control: 82, Weight: 83-86 g
Handle: FL, AN, ST, Veneers: 5+2
Composition: Limba-PBO-Power-Carbon-Limba-Ayous-Limba-PBO-Power-Carbon-Limba

1 GEWO Aruna Hinoki Carbon OFF **OF/OF+**

The legend's blade. As versatile and creative as its name-giver. GEWO Aruna Hinoki Carbon Off is very balanced, precise and provides nice and direct feedback. For a carbon blade, it provides great feel and control, and still has more than enough topspin and smashing power and speed. Aruna Hinoki Carbon Off supports all offensive playing systems and still leaves sufficient control options for passive playing. The outer ply made of the finest, carefully selected Hinoki veneers provides the special touch and excellent feel. The soft core gives great control and harmonizes perfectly with the carbon fibers. Gewo Aruna Hinoki Carbon Off – for sophisticated players.

Speed: 101, Control: 88, Weight: 90 g, Handle: FL, AN, ST
Veneers: 5+2, Composition: Hinoki – Koto – Carbon Fleece – Ayous – Carbon Fleece – Koto – Hinoki

Item no.: 9448 **€ 139.90**

3 GEWO Aruna Energy ARC OFF **OF/OF+**

The fastest blade of the Aruna series! GEWO Aruna Energy ARC OFF combines 5 wooden and 2 aramide carbon fiber plies such that a balanced combination of speed, hardness and control for passive and spin-rich strokes is obtained. If you are looking for the perfect balance of speed and control for powerful attacking without any compromises as regards spin, you may want to take a shot at GEWO Aruna Energy ARC.

Speed: 103, Control: 84, Weight: 87 g, Handle: FL, ST
Veneers: 5+2, Composition: Koto – Carbon Kevlar – Ayous – Kiri – Ayous – Carbon Kevlar – Koto

Item no.: 9449 **€ 109.90**

2 GEWO Aruna OFF **OF**

GEWO Aruna OFF is made of 7 specially selected and tested wooden plies glued together to produce an OFF power blade bursting with energy. Players who feel that carbon-reinforced blades are rather stiff and too fast, but are still looking for a powerful Off blade with sufficient speed to meet the demands of the new ABS balls, might want to take a closer look at the new GEWO Aruna OFF. The blade is designed for close-to-the-table and mid-distance topspin/counterspin rallies, and still provides sufficient control and feedback for over-the-table playing.

Speed: 97, Control: 91, Weight: 88 g, Handle: FL, AN, ST
Veneers: 7, Composition: Limba – Ayous – Ayous – Kiri – Ayous – Ayous – Limba

Item no.: 9450 **€ 79.90**

4 GEWO Aruna Carbon ALL+ **AR+**

A blade designed for creative allround players who need to rely on consistent features of their blade in any situation. The 5-ply ALL design is rather thin and is stabilized by two carbon layers. This results in a harmonic combination of great control and precise attacking potential. The GEWO Aruna ALL+ is recommended for players who feel that most OFF blades are just too fast and many ALL blades are too slow with insufficient linearity.

Speed: 86, Control: 97, Weight: 89 g, Handle: FL, AN, ST
Veneers: 5+2, Composition: Avodire – Ayous – Carbon Fleece – Ayous – Carbon Fleece – Ayous – Avodire

Item no.: 9451 **€ 96.90**

5 GEWO Aruna Kids **OF-**

The classic veneer design without synthetic fibers features a handle which is optimized for children's hands and has a slightly smaller blade surface. This makes GEWO Aruna Kids the perfect companion of young table tennis talents on their way to the top. Not too fast, a bit lighter than most blades, but still enough power and great control to make sure that our young players won't have to switch blades again at a very early stage when their technique gets better and their strokes are more powerful and faster.

Speed: 87, Control: 95, Weight: 78 g, Handle: FL, AN, ST
Veneers: 5, Composition: Limba – Ayous – Ayous – Ayous – Limba

Item no.: 9452 **€ 49.90**

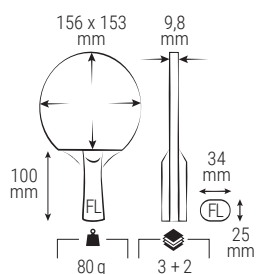

The GEWO Balsa Carbon series

ROBUST, LIGHT AND INNOVATIVE

GEWO Balsa Carbon 775

OF+

GEWO Balsa Carbon 775 is a modern OFF blade featuring the latest high-tech materials. GEWO Balsa Carbon 775 is one of the fastest blades from the GEWO blades range. The 7.75 mm thick Balsa centre ply produces all the power and speed you need for your attacks, without neglecting control and reliability in passive situations. The soft, vertical-cut balsa ply in combination with premium-end 1K-Carbon make the blade a true "Power Tool" for uncompromising attackers. Low-trajectory high-speed topspins and aggressive blocks will give your opponents the shivers.

Speed: 99
Control: 84
Handle: FL, AN, ST

Item no.: 7804

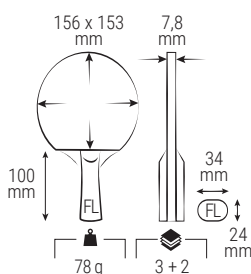

€ 64.90

GEWO Balsa Carbon 575

OF-

GEWO Balsa Carbon 575 is a controlled, well-balanced OFF- blade. Ideal for spin-oriented, direct, close-to-the-table attacking. High forgiveness on "off-centre" topspin hits. GEWO Balsa Carbon 575 is just perfect for players relying on powerful, high-precision ALL/ OFF playing. Thanks to the 5.75 mm thick, vertically cut balsa centre ply, your offensive strokes will have just enough speed at full control. Precise and well-placed attacks, high-speed topspin rallies as well as all passive strokes come easy with GEWO Balsa Carbon 575. Ultimate "feel-good" blade thanks to the combination of soft balsa material and premium 1K-Carbon: For all players relying on powerful and controlled attacking.

Speed: 94
Control: 90

BY GERMAN ENGINEERS

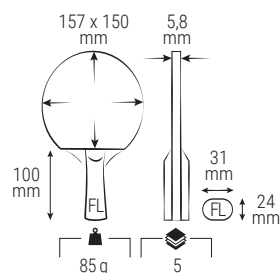

POWER FEEDBACK

GEWO Zoom Balance All+

AR+

GEWO Zoom Balance ALL combines three premium wood plies Kiri, Ayous to each other. With the inner Ayous plies and a Kiri middle ply, it makes a great combination of balance and feel („Rubber Impulse“). The layers provide for a large Sweet Spot, good bending strength and unique Power Feedback to meet the requirements of modern table tennis. The speed and control values of this ALL blade were carefully chosen and enable easy switching from passive to active playing and vice versa within the rally. You will always be in control thanks to unique „Power Feedback“. This feature is ideal for passive strokes like blocks, pushes, and well-placed returns which will put your opponent under pressure right from the start. Carefully selected wood plies provide for great feel making the blade a great choice for allrounders. In addition to excellent control, the blade also has sufficient speed potential for your own attacks.

Speed: 86
Control: 99
Handle: FL, AN, ST, FL slim

Szylyvia Kahn was a Hungarian national player, medallist at World Championships and is now a successful professional coach in the Stuttgart area.

BLADES FOR CHILDREN WINNING EQUIPMENT FOR FUTURE STARS!

"For me, these are two great new developments from GEWO – the two Talent blades in different speeds. In combination with the Hallmark Mega Spin Control rubbers, for example, a perfect combination for a great playing feeling! The two blades with solid wood feel for easy learning of stroke techniques. Especially the grips adapted to the small hand and the balance of the blades with long ball contact time totally convinced me already at the first test!" Szylyvia Kahn

In order to provide young talents with the best possible material right from the start, GEWO has worked intensively on optimizing the children's blades.

GEWO Talent OFF- OF

A blade for the next level. The Talent OFF- has a more noticeable touch due to the use of veneer Koto - Spurce - Kiri - Spurce - Koto. The heavier core ply provides higher acceleration is ideal for the advanced talent. This blade is ideally suited to be combined with more modern, faster rubbers. Thus, it can be played over a long period of time and adapts to the increasing level of performance.

HALLMARK Strategy

DEF

Five ply blade available with straight, anatomic or flared handles. A five ply slow blade designed for use with LP rubbers for close to the table play. This blade increases the effect of LP rubbers when blocking close to the table. Reverse rubber can be used on the other side which gives a good contrast for swapping between attack and defence.

Speed: 25 • Control: 100 • Weight: 80 g
Handle: FL, AN, ST, Veneers: 5

Item no.: 1081 € 44.90

HALLMARK Aurora

DEF/AR

Very light blade with two different speed sides. Perfect for players who act with the defence side with long pimples near the table. The faster forehand side has an Anti-Vibration Cork Technology for attacking with maximum spin and a better sweetspot.

Speed: 89/65 • Control: 92/99 • Weight: 70 g
Handle: FL, AN, ST, Veneers: 5

Item no.: 3379 € 54.90

HALLMARK Combination

DEF/OF

Light blade of only 75 g. The plys have been selected to produce a blade with the two sides of the blades at different speeds. The backhand is slower with more control and the forehand is faster. Perfect combination for players using long pimples on the backhand. This blade offers maximum spin reversal.

Speed: 91/75 • Control: 91/95 • Weight: 75 g
Handle: FL, AN, ST, P, Veneers: 5

Item no.: 1897 € 59.90

HALLMARK Enigma

DEF

Very ligh blade of only 65 g. Oversize blade with thick double balsa core. Excellent for attacking play, even with pimple rubbers. Outstanding control, incredible attacking properties with long pimples.

Speed: 84 • Control: 94 • Weight: 65 g
Handle: FL, AN, ST, Veneers: 5

Item no.: 3378 € 59.90

HALLMARK Ultra

AR+/OF-

Five ply large oversize blade with a thick balsa core. This blade has incredible attacking characteristics. Good choice for players who want to disrupt their opponents game offensively with long pimple rubbers. Also suitable for offensive short pips and pips inside rubbers.

Speed: 94/85 • Control: 89/85 • Weight: 90 g
Handle: FL, AN, ST, Veneers: 5

Item no.: 1021 € 59.90

HALLMARK Carbon Extreme

OF+

Seven ply offensive blade. The special carbon veil on top of the balsa gives utmost control. Carbon Extreme is a very fast blade with an enlarged sweet spot. Perfect for over the table play. With ACT Technology.

Speed: 100 • Control: 97 • Weight: 80 g
Handle: FL, ST, Veneers: 7

Item no.: 2931 € 79.90

FLEX FORCE PRO

Whether it's quick changes of direction, fast sprints or dynamic stops – the FLEX FORCE PRO gives you the support you need. With its innovative combination of breathable and durable materials, this indoor shoe ensures optimum grip, a comfortable feel and responsive movements. The upper material consists of a clever mix of PU, TPU and mesh – lightweight, robust and breathable at the same time. Around 25 % of the shoe is reinforced with heat-sealed TPU to protect high-wear areas from heat, cold and moisture – without adding weight. The rest of the PU and mesh upper material ensures durability, flexibility and a fresh foot climate, as moisture is optimally wicked away.

in size 41

Drop: 15 mm

NEW

FLEXXION
Technology

Table tennis is a sport of extremes: short, explosive movements alternate with lightning-fast changes of direction and controlled gliding phases. No other indoor sport places such precise demands on footwear. A good table tennis shoe must therefore be lightweight and flexible, while also offering grip, stability and joint protection. In addition to providing perfect grip on smooth indoor floors, key requirements for modern table tennis footwear include excellent lateral stability, a comfortable fit, and a breathable upper. Especially in long matches, every gram and every missing bit of support can make a difference.

The highlight: the integrated Flexxion technology.

A stabilizing element embedded in the midfoot area enables natural freedom of movement between the heel and forefoot – for dynamic play with optimum control.

Features & benefits:

- ➔ **Flexxion Technology:** Stabilising element integrated into the midsole for independent movement between heel and forefoot
- ➔ **Non-marking, slip-resistant sole:** Provides excellent grip on all indoor surfaces
- ➔ **Cushioned midsole:** Offers optimal energy return and joint protection
- ➔ **Breathable upper material:** Ensures a pleasant foot climate even under high stress
- ➔ **Reinforced side zones:** Enhanced support for lateral movements
- ➔ **Inner lining with comfort padding:** For a perfect fit and great wearing comfort

SIMPLY THE BEST

Premium-end footwear with unbeatable value for money.

GEWO TT-Super

We have re-designed our classic table tennis shoe. The high-friction special, non-marking, indoor sole which has been used for years offers excellent skid resistance and ensures secure footing on any type of floor. In addition, the lightweight shoe provides for direct floor contact, a feature most players highly appreciate. Improvements include re-designed top material and additional sole stitching. Exceptional footwear with soft, robust top material, combined with air-permeable, breathable mesh nylon. Reinforced, padded heel counter for more stability and comfort. Solid workmanship for long life.

GEWO Junior Flex

Sizes: 34–38

Weight: 222 g Size 36 / Drop: 3 mm

The GEWO Junior Flex shoe has been specially developed for young table tennis talents who want to focus on quality right from the start. This indoor shoe combines proven materials with modern technology – for optimum support, maximum comfort and the necessary flexibility for fast play at the table. Breathable upper material: High-quality mesh inserts ensure a pleasant foot climate and actively counteract perspiration – even during intensive training sessions. Stable lateral support: Reinforced zones in the midfoot and heel area protect against twisting and provide secure support – a must for growing children's feet. Comfortable padding: Soft inserts on the tongue and heel edge ensure a pressure-free fit and a high level of comfort. Robust and durable: Double seams, a sturdy heel cap and hard-wearing materials make this shoe a reliable companion for many training sessions. Area of use: Ideal for training and competitions in the hall – particularly suitable for junior players in club or school sports.

Sizing Tip: Please allow for approximately 1 cm of space in the toe area – this ensures an optimal fit even during growth phases.

- Child-friendly design
- Lightweight, flat indoor shoe for fast movements in table tennis, ideal for training and competition
- Non-marking, slip-resistant sole
- Reinforced zones in the midfoot and heel areas prevent ankle rolling
- The modern, bright Color scheme appeals to both boys and girls and pairs well with most sports outfits.

GLUE & SEAL

1 GEWO HydroTec Glue

The GEWO HydroTec rubber glue consists of 100% liquefied natural rubber. It is a solvent-free, water-based adhesive (HydroTec) and is completely free of organic solvents (VOC-Free). Its easy, fast and practical application - specially suitable also for use with open-pore sponges - allows rubbers to be removed from the blade later on without difficulty. Glue residues can also be easily removed from both the rubber and the blade.

2 GEWO Clean Stick glue

Water-based. After a short curing time, it provides for optimum bond between the blade surface and the sponge. The rubber and glue residues can be removed easily.

Does not contain any VOC, according to the directives of the ITTF.

3 GEWO Blade sealing Cleanstick

A practical protection for your blade. Sponge applicator.

Volume: 25 g

Item no.: 4055 € 8.90

Baseprice: € 356.00 / kg

4 GEWO glue sheet HydroTec Duo

Consists of two self-adhesive sheets: an impeccable gluing, no time of drying, a perfect care of your blade and rubbers and especially no residue of adhesive mass after unsticking.

Item no.: 10911 € 5.90

5 GEWO Rubber assemble roller

For the perfect rubber assembly.

CLEAN & PROTECT

Perfect protection and care guarantee a long life.

GEWO HydroTec Cleaner

Rubber cleaner for solvent-free cleaning and care of all types of table tennis rubbers. Without violate organic compounds (VOC-free). Effective cleaner for all table tennis rubbers. Ideal for cleaning and care plus extra tackiness for all table tennis rubbers. With anti-static effect. Apply cleaner on dirty rubber surface evenly. After a short time, remove the residues using a cleaning sponge or cloth to remove dirt and dust from the rubber.

NEXXT LEVEL TRAININGSROBOTER

GEWO®
THE BETTER WAY TO PLAY

**SUITABLE
FOR ALL LEVELS
AND ALL AGES**

The advanced technology, versatile applications, its innovative and uncomplicated control and very durable materials characterise the new premium table tennis robots of the GEWO Nexxt series!

These robots redefine your table tennis training and set high standards. With the highly variable ball guidance technology, balls can be played in a variety of cut combinations one after the other without having to readjust the robot head. Spin, speed, flight height and placement can be precisely adjusted for each ball.

The height-adjustable ejection head very precisely simulates the almost complete width of the most diverse playing situations. This makes the new GEWO Nexxt table tennis robots a perfect and always available training extension for true professionals, beginners and all players in between.

GEWO Europa 25

High-end competition table for use in national and international tournaments and competitions. Robust table for club use. The table meets Class A requirements of EN 14468-1. The 25 mm thick Micro fine chipboard guarantees optimum high-speed playing properties. The playing surface receives several pre-treatments and is finally provided with a special curtain coating finish. This special coating guarantees a high sliding friction coefficient at a very low gloss level. The lines are silkscreened in a very thin, non-feelable layer. In this way, the playing properties are the same as in the playing surface of the table. Yoke frame with easy-to-use folding mechanism for quick setup and storage. Each half is provided with 2 large wheels for easy vertical transport.

Very compact storage dimensions: L: 152.5 cm, W: 16.5 cm, H: 142 cm, H: Competition table according to EN 14468-1. Net sets are not included in any table.

GEWO Indoor Duo

The 22 mm special GEWO playing surface (3tecWOOD premium) guarantees equal and fast ball bounce. The GEWO Table Indoor Duo 22 only requires minimal storage space of approx. 20 cm depth. The undercarriage is made of high-quality metal and is absolutely stable. Safety devices on each half of the table ensure the necessary safety during assembly and disassembly. Unevenness and different standing heights of up to 30 mm can be compensated for using the height adjuster on the rear legs.

The table is perfectly suited for school and hobby sports as well as a training table for clubs. Outstanding value for money. „Made in Germany“ quality! Rackets, balls and the net set are not included!

- indoor table, not weatherproof
- the perfect training table
- European standard: EN-Norm 14468-1
- net weight: 95.5 kg
- Playing position (in accordance with international dimensions): l=274 cm x w=152,5 cm x h=76 cm, storage position: l=152,5 cm x w=60 cm x h=172 cm

Color: blue, green

SC 25 PREMIUM

High-Tech „made in Germany“ setting
a New Standard!

GEWO[®]
THE BETTER WAY TO PLAY

GEWO SC 25 Premium

Thanks to the elaborate and intuitive mechanical interlock/safety system, the GEWO SC 25 Premium is easy to use and provides for maximum safety. The SC ("super compact") system developed for GEWO enables easy folding of the table via the "SC gear" (special functional unit connecting the two 25 mm table elements). GEWO SC 25 Premium is ITTF approved for use in league competition. The SC 25 Premium is the top-end product in the GEWO table series as regards state-of-the-art design, durability, minimum space requirements, high-quality playing features and setup/takedown safety. The sophisticated design also considered additional details: with a 400 mm clearance between the edge of the table and the frame, it meets all requirements of wheelchair sports. Each of the 4 table legs is equipped with adjustable feet for perfect adjustment of the height of the table on the players' sides. The table comes fully assembled and packed in special cardboard packaging. The steel tube and reinforcement frames which are screwed to the surface and joined using stable corner connectors provide for maximum stability during use, setup/takedown, moving, transport and storage. Colors: green, blue
